

Key Performance Indicators

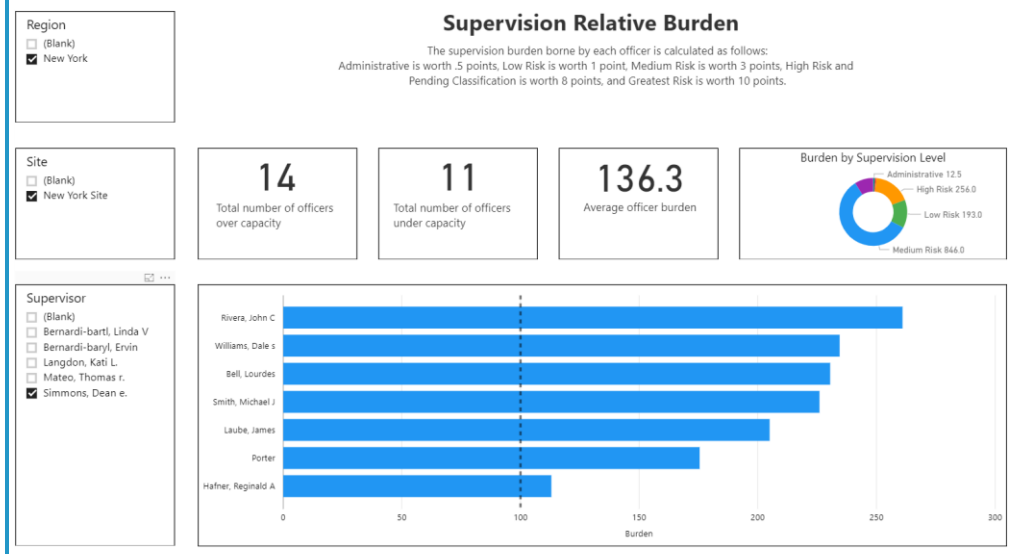

AutoMon's Caseload Explorer customers have access to **Ce Analytics**, providing critical insights into the general health of their agency and their case management database. Ce Analytics gives senior management the tools needed to deeply visualize and analyze all of their case management data through a series of dashboards which display Key Performance Indicators (KPIs). Ce Analytics presents dashboards and metrics providing insight into Supervision Relative Burden, Investigation Relative Burden, Contact Compliance, Clients Needing Attention, Data Integrity and other key performance indicators that are critical in mitigating recidivism.

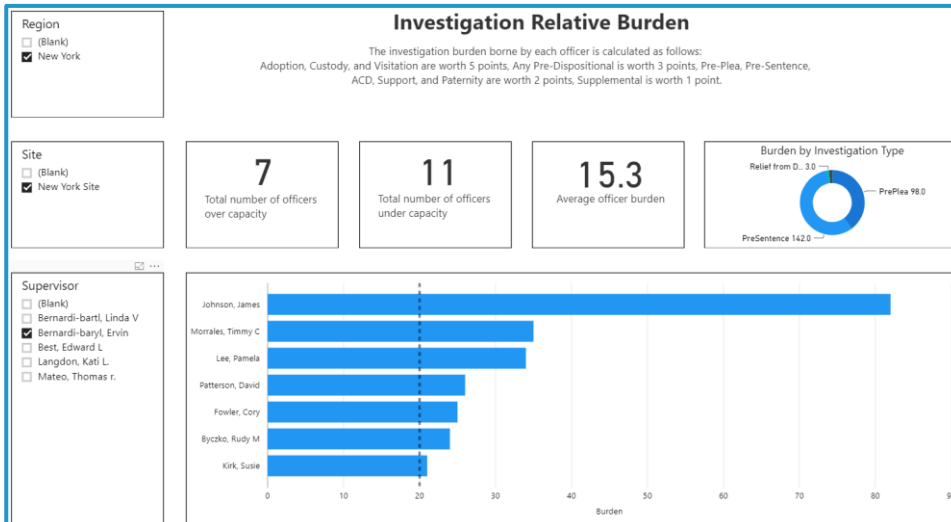

Built utilizing Microsoft Power BI™, Ce Analytics provides agencies the flexibility to add additional dashboards to measure KPIs unique to their individual agency.

Ce Analytics allows Probation Chiefs, Directors and Senior Management to:

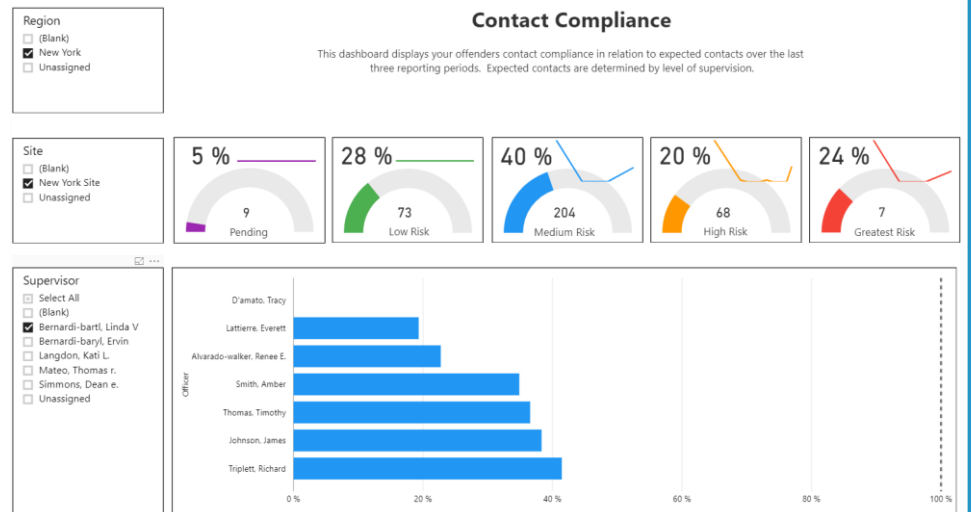

- Visualize agency-driven data to allocate resources efficiently;
- Manage caseload and investigations assignments through insight into overburdened and under burdened Officers;
- Gain insight into critical data integrity issues within Caseload Explorer;
- Identify Clients who are in immediate need of attention;
- Export data for reporting.

View the amount of Pre-sentence, Pre-plea & Supplemental Investigations that are assigned to each Investigations Officer, & the associated Relative Burden. "Burden" is measured by a weighted value representing the investigations assigned to a specific Officer & assists management in assigning future Investigation assignments.

The Contact Compliance Dashboard is a general representation of Client contact compliance over the last 3 reporting periods, or last two quarters. It also displays the average Contact Compliance sorted by Client's Supervision Level.

 Past Maximum Expiration

Data Integrity

This Dashboard sheds light on data integrity issues. Correcting these issues will improve the accuracy of reports, give a clearer picture to the agency of the offenders under supervision, and clear up false or confusing information about offenders.

Bell, Lourdes	Rodriguez-merced, Betty J	40225	Past Maximum Expiration	This client is past their maximum expiration date of 06/13/2016 for supervi
Bell, Lourdes	Rodriguez-merced, Betty J	40225	Past Maximum Expiration	This client is past their maximum expiration date of 09/19/2016 for supervi

The Data Integrity dashboard identifies data errors within Caseload Explorer, allowing for corrections to be made for accurate reporting. Numerical overviews are displayed, highlighting critical Caseload Explorer errors, including Active Clients on a Closed Caseload, Duplicate ID, Clients Missing a Disposition and Clients' Past Maximum Expiration Date.
