## ***Ce Drug Testing Overview:***

- A paperless system with an electronic record for each completed and aborted test;
- Configurable testing workflow based on defined agency policies and procedures;
- Access to data via the internet for complete mobility in the field;
- Ability to create randomized testing groups or conduct individual tests;
- Ability to capture images of testing devices to store with the test record;
- Real-time access to agency test data for reporting and analysis;
- Fully integrated with Caseload Explorer, recording results from Ce Drug Testing as Drug Test Event;
- Integration capabilities with third-party Drug Testing laboratories via standard web services API;
- Ce Drug Testing is hosted on Microsoft's Azure Government Cloud Hosting Platform, provide full CJIS, HIPPA and FedRAMP compliance.

# Ce Drug Testing

Drug Testing Data Management

Ce Drug Testing features a comprehensive Analysis tool for users to view a variety of aggregate data measurements. Users can configure their dashboard, featuring real-time data to monitor and manage data relating to donors, results and test rates.

Ce Drug Testing displays a list of donors who have been either randomly or manually selected for testing during a defined time period to aid Users in managing drug testing schedules.

The screenshot shows the Ce Drug Testing interface with a list of donors. The interface includes a search bar, navigation icons, and a table of donor information.

Name/Id	Location	Pool	Selection	Due	Last Test
Brandy Goodman #1000383	Bisbee	Programmer	Return to Duty	6/6/2013	13 days
Cory Beck #1000124	Bisbee	Sales	Follow Up	6/10/2013	5 days
Victoria Cole #1000405	Bisbee	Programmer	Random	6/30/2013	0 days ago
