Ce Field provides easy access to important client information, including mugshot, risk level, caseload, Supervising Officer, Contact History, Safety Alerts, Warrant Status, Active Conditions, Charges, Associates and all contact information stored in Caseload Explorer.

Increased Officer Safety and Efficiency:

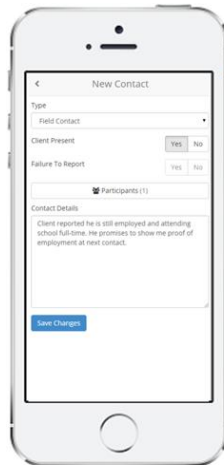

- Access the most current client information through an integration with Caseload Explorer, providing the most current client data and allowing Officers to make the safest and most informed decisions;
- Increase officer safety by displaying Caseload Explorer's Safety Alerts and active Warrant Alerts when viewing a client's overview;
- Access step-by-step audio driving directions from an Officer's current location to a client's address for smarter, time-efficient routes;
- Quickly enter a contact event from any web-enabled mobile device, featuring built-in speech to text entry for contact details;
- Eliminate duplicate data entry and save valuable time as all contact notes recorded in Ce Field are synchronized as Contact Events in Caseload Explorer;
- Create, manage and track progress with Itineraries for planned field visits.

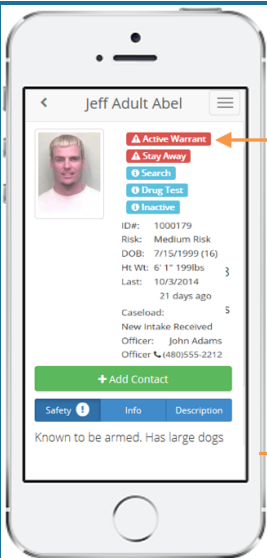

Ce Field

Field Contact Management

Contacts entered in Ce Field are automatically populated in Caseload Explorer as a Contact Event, including Contact Type, Collateral Contacts and Contact Details/Notes. Officers can utilize their mobile device's speech-to-text functionality to dictate contact notes to save significant time with data entry.
